Guerrero Olivos advised Sonnedix Chile Holding SpA on the matter

Sonnedix, the global solar independent power producer (IPP) has been awarded 903 GWh/yr, equivalent to 39% of the National and International Public Tender for the Supply of Energy and Electric Power 2021/01, in which 29 Chilean and foreign generating companies participated.

The tender, which reached a new historical low of US\$23.39/MWh on average, auctioned 2310 GWh to supply the energy needs of regulated costumers of the National Electric System (SEN) for a period of 15 years from 2026.

Sonnedix currently has 4.6 GW of total capacity, including a development and construction pipeline of over 3 GW. The solar IPP continues actively seeking development and acquisition opportunities across OECD countries.

On the preparation of this proposal, Sonnedix was advised by Guerrero Olivos with a team including Sebastián Abogabir Méndez (Picture) and Andrea Olea M.
